REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 3, the primary reason for allowance is the inclusion of the chamber having at least one elastic wall constructed to utilize Laplace's law and including a self-contained fluid for applying the static pressure to the measurement site such that the level of applied pressure is substantially unaffected by the mechanical characteristics of the underlying tissues, in combination with all of the other limitations of the claim, which is not taught or suggested by the prior art of record.

Regarding claims 6, 8, 10, 12-16, 18-29, 31-34, 36, 42-44, 46-48, 50-65, 67, and 68, the primary reason for allowance is the inclusion of the spring for applying static pressure or resilient elastomeric material being of a relatively large uncompressed length such that the effective pressure generated by it, when it is compressed, is substantially unaffected by relatively small variations in compressed length due to the mechanical characteristics of the underlying tissues, in combination with all of the other limitations of the claim, which is not taught or suggested by the prior art of record.

Regarding claims 17, 66, and 69, the primary reason for allowance is the inclusion of the clamping device for applying a clamping force to the base of the probe when applied to the measurement site, and a counter-force to the respective body part of the subject at the opposite site of the measurement site, in combination with all of the other limitations of the claims, which is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
